

Affordable & easy to use

EC-B – BASIC SYSTEM FOR HEIGHT- AND/OR SLEW LIMITATION

EASY TO INSTALL ON NEW MACHINES
AS WELL AS RETROFIT TO EXISTING MACHINES

 InTeEx

EASY AND USER-FRIENDLY

InTeEx EC-B Basic system is developed for machines in working environment where there are demands or needs to protect material parts as for example buildings, infrastructure in the ceiling of a tunnel or machines on adjacent facilities.

INTUITIVE

The operator defines current tool size as well as desired boundaries, then the system smoothly limits the machines movement by proportional valves.

SHORT INSTALLATION TIME

- Easy installation
- Short downtime
- Minimal impact of host machine
- Can be installed on for example excavators, wheel loader or other machines in need of height- and/slew limitation

MISC.

- Tare function of displayed height
- Simple visualisation of digging depth out of tared value

RELIABLE

- The system is CE-marked
- Proven standard components

TWO INDIVIDUAL BY-PASS SOLUTIONS
– for safety
